PRODUCT OVERVIEW

The TY-SUB-KT1 Subwoofer Power Pack is designed to add powerful low-frequency performance without replacing the factory radio. Utilizing the Axxess AXLOC interface and a vehicle-specific T-harness, this package integrates seamlessly with the OEM audio system while retaining factory features and functionality.

The included VIBE Audio 650.1 mono block amplifier delivers efficient, reliable power for a wide range of subwoofer applications, while the included Raptor 4-gauge amplifier wiring kit provides the components needed for a professional installation. The plug-and-play AXLOC interface connects behind the factory radio, reducing installation complexity and eliminating the need for extensive vehicle modifications.

Whether paired with an OE Fit enclosure designed specifically for your vehicle or a universal enclosure, the TY-SUB-KT1 provides a flexible foundation for building a bass system that matches your vehicle and listening preferences.

Features:
- All-in-one solution for adding a subwoofer amplifier
- Retains factory radio functionality and vehicle features
- Axxess AXLOC integration interface included
- Vehicle-specific plug-and-play T-harness
- VIBE Audio 650.1 mono block amplifier included
- Raptor OFC 4-gauge amplifier wiring kit included
- Simplified installation with behind-the-radio integration
- Compatible with OE Fit and universal subwoofer enclosures
- Designed for amplified & non-amplified audio systems

Specifications:
- Integration Interface: Axxess AXLOC
- Amplifier: VIBE Audio PB650.1D-V4 Mono Block Amplifier
- Amplifier Wiring Kit: Raptor 4GA
- Installation Type: Plug-and-play integration with vehicle-specific T-harness

Includes:
- Axxess AXLOC interface
- Vehicle-specific T-harness
- VIBE Audio PB650.1D-V4 mono amplifier
- Raptor 4-gauge amplifier wiring kit
- Installation hardware
