PR-FD1

INSTALLATION & INTEGRATION KIT

FITS **FORD F-150** 2015–2020 | **SUPER DUTY** 2017–2022
(WITH FACTORY 8" SCREEN)

Upgrade the Dash. Keep the Features.

Vehicle Integration Features:

- Designed specifically for the Proscenium® PR-10 10.1" radio, sold separately
- For select Ford F-150 and Super Duty trucks equipped with an 8" factory screen
- 8" screen mounting plate provides direct mounting for the PR-10 screen
- Mounts within the factory cavity without disassembling factory HVAC controls or sub-dash structures
- Screen mounts directly to the dash kit; radio chassis securely mounted in the vehicle's dash
- Ford-specific interface docks directly to the radio chassis and is preconfigured for the application
- Retains supported factory steering wheel controls, backup camera feed, and vehicle warning chimes
- Displays supported vehicle telemetry, tire pressure, battery status, and climate feedback
- Vehicle-specific plug-n-play wiring harness
- Factory antenna adapter and direct replacement OEM-style USB hub

Radio Features

These features are built into the Proscenium PR-10 radio, which is required and sold separately. SWC configuration is a radio function; retaining factory steering wheel controls requires the compatible kit interface.

- Steering wheel control (SWC) configuration
- Widgets: clock, audio controls, switch triggers, cameras, and RGB lighting (HE-CHASE-PRO controller required, sold separately, for RGB lighting)

Radio Features with Kit Interface

When installed with the PR-10 radio, the kit's interface provides access to supported factory features. The platform functions listed below are available only where supported by the vehicle's factory equipment and the kit's interface coverage.

- Personalization: language, units, safety settings, lights, doors and locks, engine-off settings, compass, and auto start
- Vehicle information: engine temperature, tire pressure monitoring (TPMS), hood status, door status, trunk status, and battery voltage
- Engine gauges: battery voltage, oil temperature, oil pressure, transmission temperature, coolant temperature, RPM, intake air temperature, and engine load
- Performance: engine temperature, tachometer, battery voltage, speedometer, and odometer
- Off-road information: pitch and roll, compass, transfer case, and tire angle
- Drivetrain: steering angle, front axle lock, rear axle lock, sway bar lock, transfer case gear status, engine temperature, and battery voltage
- Camera views: backup, front, left, right, and auxiliary
- HVAC: heated seats, cooled seats, OFF, AUTO, MAX, SYNC, DUAL, rear defrost, windshield defrost, and recirculation
- Rear HVAC: heated seats, cooled seats, SYNC, and MODE
- Interface-enabled widgets: climate controls, vehicle information, gauges, door status, pitch and roll, parking sensors, and blind spot sensors

INSTALLATION & INTEGRATION KIT

FITS **FORD F-150** 2015–2020 | **SUPER DUTY** 2017–2022
(WITH FACTORY 8" SCREEN)

Modular Chassis Design. A Smarter Way to Install.

This kit includes vehicle-specific mounting components, a chassis-mounted interface, and plug-n-play wiring for installation while retaining factory features. An 8" screen mounting plate provides direct mounting for the PR-10 screen in the factory screen opening. The PR-10's screen mounts directly to the dash kit, and the radio chassis is securely mounted in the vehicle's dash. The mounting system fits within the factory cavity without requiring disassembly of the factory HVAC controls or sub-dash structures. A factory antenna adapter and a direct-replacement OEM-style USB hub complete the installation.

The Ford-specific interface docks directly to the PR-10 chassis and is preconfigured for the application, reducing loose interface boxes and excess wiring behind the dash. When installed with the PR-10, it retains supported steering wheel controls, the factory backup camera feed, and vehicle warning chimes. It also displays supported vehicle telemetry, tire pressure, battery status, and climate feedback on the radio's touchscreen. Retained features and available information vary by vehicle equipment and configuration.
