Modular Chassis Design. A Smarter Way to Install.

Create a clean, integrated dashboard upgrade with the PR-7 universal radio and a vehicle-specific Metra 95-series dash kit. Engineered and designed in the USA, the PR-7 features a patented modular chassis design with a separate display connected through a single LVDS cable. A compatible harness or basic interface completes the radio connections, as required by the application. The modular chassis provides installation flexibility behind the dash.

Integrate Seamlessly with a Metra Dash Kit.

The Proscenium PR-7 universal radio integrates seamlessly with existing Metra 95-series dash kits, unlocking thousands of vehicle applications. From classics to today’s latest models, Proscenium adapts - giving every driver access to the future of in-dash technology.

FIND THE RIGHT DASH KIT
WITH THE METRA FIT GUIDE

1. Go to MetraOnline.com
2. Select the Year, Make, and Model
3. Select GET PARTS
